# FLOATING FOUNTAINS

*Best Prices Anywhere!*

## MEDIUM FOUNTAIN KIT

- 3500 GPH (290-watt low energy asynchronous pump)
- 27" very durable float
- 100' mooring rope
- Large coated steel filter basket
- Set of 3 nozzles, 1 1/2" female, patterns up to 18' high!
- Plugs into your GFCI 110-120V outlet
- Available in 100' - 150' cable lengths
- Lowest Prices Around!
- 1-year warranty on fountain (and lights if purchased)

## LARGE FOUNTAIN KIT

- 14000 GPH (590-watt low energy asynchronous pump)
- 27" very durable float
- 100' mooring rope
- Large coated steel filter basket
- Set of 3 nozzles, 4" female, creating patterns up to 12' high!
- Plugs into your GFCI 110-120V outlet
- Available in 100' - 200' cable lengths
- Lowest Prices Around!
- 1-year warranty on fountain (and lights if purchased)

## LARGE STAINLESS FOUNTAIN KIT

- 14000 GPH (590-watt low energy stainless steel pump)
- 36" very durable float
- 100' mooring rope
- Large stainless steel filter basket
- Set of 3 nozzles, 4" female, creating patterns up to 12' high!
- Plugs into your GFCI 110-120V outlet
- Available in 100' cable lengths
- Truly the lowest prices!
- 18-month warranty on fountain, white LED lights are free for beta testing

# LIGHTS

*For Small Ponds and Fountains*

*For Large Floating Fountains*

## LED Lights for Small Ponds and Fountains, Garden Accents

GL1-LED

GL1-3LED

- Transformer with 120-v plug in
- Stainless steel hardware
- Durable fixture mounts for attaching to float
- 1-year warranty

### New LED Light For Free

Still in beta testing

Only available with Large Stainless Steel Fountain Kit

## *What types of pumps does Fountain Tech offer?*

Fountain Tech sells three kinds of pumps: submersible (*which must be underwater to prevent motor burn out*), dual purpose (inline) pumps, (*which may be used submersed or out of water*), and specialty pumps with switches. We also sell small solar.

Most Fountain Tech pumps come packaged in designer boxes, barcoded for your convenience.

Though some companies offer low-water shutoffs for pumps, we are not comfortable with the sensors in these pumps. The sensors can go bad and shut off the pump unnecessarily, so we do not offer this technology.

## *What types of floating fountains does Fountain Tech offer?*

We offer three models, using 3,500 to 14,000 gallon per hour pumps. These are highly reliable, energy efficient units that come complete and ready to plug in.

### **EFFICIENCY**

All Fountain Tech pumps are designed with energy consumption in mind. Every single pump is rated as “energy efficient” with most models earning “Low Energy Consumption” certification. This makes for a low cost of ownership.

### **VALUE**

At Fountain Tech, we believe in providing superior customer service, while maintaining a lean manufacturing and distribution network. This allows us to give you the very highest quality product at the best possible price. Our warehouse in Southern California has most items in stock year-round, ready for same day shipping, whether you need one pump or a hundred.
